Projects:

1. **Title:** Riduh Events – Event Booking & Management System (Laravel 12)
- **Description:** Developed a production-ready, role-based Event Management Web Application using Laravel 12 with secure authentication, online ticketing, payment integration, analytics, and automated testing.
- Key Features:
- Designed a multi-role access control system (Admin, Organizer, Vendor, Staff, Attendee) with dedicated dashboards and role-based permissions.
- Implemented Event Creation & Approval Workflow with organizer submission and admin moderation.
- Developed a Ticket Booking System with coupon/discount management and booking validation.
- Integrated SSLCommerz Payment Gateway (bKash, Nagad, Cards, Internet Banking) along with Offline Cash/Bank Transfer, including secure server-side payment verification.
- Implemented Google OAuth Authentication using Laravel Socialite.
- Built QR Code-based Ticket Generation & Event Check-in for efficient attendee verification by staff.
- Developed Vendor Management and Staff Shift Assignment modules.
- Implemented Reviews, Favorites, Email Notifications, and In-App Notification systems.

**Religion**

ISLAM

**Parmanent Address**

ANGARIA,DUMKI,PATUAKHALI

**District**

PATUAKHALI

Created Analytics Dashboards for Admin and Organizer with CSV Report Export functionality.

Designed a fully responsive UI optimized for desktop, tablet, and mobile devices.

Wrote 48+ automated test cases using PHPUnit to ensure application reliability and maintainability.

**Technology Stack:**

Laravel 12, PHP 8.3, MySQL, Blade, Tailwind CSS, Laravel Breeze, Laravel Socialite, SSLCommerz API, PHPUnit, Git/GitHub

- **for details go to:** <https://event-ms.devfoliox.com>

2. **Title:** EventFlow: Role-Based Event Management System (Laravel + React)

- **Description:** Developed EventFlow, a complete event management platform where organizers can create and manage events, attendees can browse and book tickets, vendors can manage bookings, and staff can be assigned tasks with permission-based access control. Key features include a coupon and discount engine, secure online payments through SSLCommerz, Google Sign-In authentication, real-time attendance tracking, and an admin panel with analytics and CSV reporting. Built using Laravel 12 for the backend, React (CRA) for the frontend, and MySQL for data storage, with the project independently deployed to production.
- **for details go to:** <https://eventflow.devfoliox.com>

3. **Title:** pharmacy mangement laravel12

- **Description:** Admin — Full system control, including users, medicines, suppliers, purchases, sales, stock, expiry dates, reports, and system settings.  
Pharmacist — Manages medicines, prescriptions, stock, medicine expiry dates, sales, purchases, and monitors low-stock or expired medicines.  
casheir — Handles medicine sales, customer billing, invoices, product search, stock checking, and basic sales-related reports.
- **for details go to:** <https://pharmacy.devfoliox.com>
